Wind of Change at Mielkendorf: Jörg Wadehn will be Uhing's new Technical Director

On July 1, 2013, Jörg Wadehn (46) will be appointed Technical Director of Joachim Uhing GmbH & Co. KG. As successor of Burkhard W. Bohn who took his well-deserved retirement in December 2012, he will lead the company into the future with technical innovations.

Chartered Engineer Jörg Wadehn (Mechanical Engineering), working for Uhing since November 2012, has to his credit a wide range of technological expertise in executive positions in international companies. Two of his major positions: he was R&D Manager at AVL Zöllner, Kiel, the world's largest private manufacturer of engine dynamometers. Later, his passion for technological innovation led him to VESTAS Wind Systems A/S. In the Danish company, he worked as a transmission specialist and developed bearing and transmission systems for the drive train and the rotor blade pitch adjustment.

Among the great number of applicants for the advertised position, Wadehn convinced with his technical versatility, his expertise in filing patents, and the executive positions held so far. Being born in Schleswig-Holstein, the appointment to Managing Director of a technological world market leader represents the next consequential step in his career.

In his new field of responsibility, Jörg Wadehn will continue developing the tried and tested Uhing products for future applications, promote the development of innovations and further optimise the production processes. "I have a great number of visions to be translated into interesting products," says Wadehn, looking forward to add new momentum to the product range of the highly specialised niche supplier together with the Uhing team.
